---

Hi Susan,

I wanted to pass along the final report from the Devils River habitat work last year from TXFWCO. It doesn't include the 5mm hornshell found during invertebrate sampling, as that was a different project. I had a draft of this report on my desk and failed to comment on it because it was during the same week as the expert meeting. The hornshell photos in the report are all mine, if you need them for something I can provide them.
